log10(ratio)
iron ion transport
cellular iron ion homeostasis
iron ion homeostasis
transition metal ion transport
cellular transition metal ion homeostasis
−log10(pvalue)
nuclear chromosome segregation
nuclear division
organelle fission
chromosome segregation
negative regulation of cell cycle phase transition
learning
neuromuscular process
modulation of chemical synaptic transmission
regulation of trans−synaptic signaling
mammary gland morphogenesis
cytoplasmic translation
negative regulation of ubiquitin protein ligase activity
ribosome biogenesis
ribonucleoprotein complex biogenesis
ribosomal small subunit biogenesis
myelination
axon ensheathment
ensheathment of neurons
axon ensheathment in central nervous system
central nervous system myelination
